- Pune (411048), India

Profile

- Data Structures and Algorithms
- Good coding practices
- Web Developer

Internships

- Konzept Frabrica Technology▪ Pune ▪ India

  Web Development Intern (06/2019 – 09/2019)

  I worked on product named AROGYAN which is a management software for multi-speciality hospitals. I was completely responsible to develop the frontend of the web app which was developed on Angular framework. I had completed total 3 modules of the app wiz login module, practitioner module, customization and about section.

- Inprospect Technologies ▪ Pune ▪ India

  Web Development Intern (12/2018 – 01/2019)

  Inprospect is a product which provides extended ERP features to the colleges and also acts like a go to app regarding college events for students. I worked on the frontend of the app along with user authentication for first month. Afterwards I was assigned the work to convert the web app into PWA i.e. progressive web app which makes website work offline with restricted features and enables notifications on pc.

Projects

- Unbeatable Tic Tac Toe
  Minmax algorithm was used to build a single player tic tac toe game which would always win or tie the game.
- Face and object detection
  Face detection using MTCNN and Harrcascade.
  Object detection using YOLO.
- Shopping Website Clone
  College project was to implement RDBMS and JSP in real world project. So I developed a clothing website with basic functionalities like login, signup, explore and filter products for customer and add products for cloth seller through seller login.
